

VirtualDJ 8 only supports DJ style mixtapes. if you have ever used virtual dj, you know that you have to create a new playlist in the program to start each song individually. To do this, you must have a set of all of the songs on the disc that you want to start in your playlist. The following steps show how to create and load your entire set of songs to start. Instead of going into setup mode, you go into play mode. Once in play mode, you can drag and drop the songs you want to use on the playlist (using the little finger and thumb of the left hand), and let the software do all of the work for you. Once all of your songs are selected and you are in play mode. you can go into setup mode. If you are using.wma files, the steps for creating and loading the song list and setting up the songs will be the same as for wav files, except the filename will change. If you prefer to create your song list manually, feel free to do so, but they are not necessary. In this chapter, you will learn how to create and load songs into a playlist using the software. These steps will work using the DJ style of playlist and the CD. How to Create and Load a DJ Mix of Songs. The DJ style playlist, when created in the software, allows for crossfading between songs and starts each song at the location that you specify. These steps will be used by those using DJ style lists when using the software. As an alternative, you could use a different song list, such as a Smart DJ, Trance DJ, or Tempo DJ type playlist in the software, though this is not recommended. VirtualDJ 8 - Adding Songs. In the top menu, the first option is, which brings you to the file list. VirtualDJ may be able to begin on a disc at either the start or the end. You will see that you have all of the songs in your song list. Select the first song in the file list and play a song. The software will be able to detect the information on the first audio track on the disc and begin playing. The following video demonstrates how to use VirtualDJ 7 to play a disc. You can also use the basic USB CD playback, or you can directly load a disc into a file browser. VirtualDJ 7: How to Play CDs as Tunes. When you receive a CD that you would like to play
